### PHT120 Cylinder Head Pressure Tester machine

€11.300,00

Â

PHT120 pressure tester allows for fast and easy detection of cylinder head condition. The machine is designed for easy operation, with a minimum maintenance and optimized for safety. The machine comes standard with a preheating programmer. The heat is controlled by an electronic thermostat. Cylinder heads are able to be rotated 360Â° with the standard hydraulic system.

Â

#### Specifications

- Maximum Cylinder Head Capacity **1350x415x300 mm**
- Maximum Cylinder Head WeightÂ **300 kg**
- Stainless Steel Tank CapacityÂ **540 l**
- Maximum Cradle Stroke **600 mm**
- Heating Elements **2 x 4,5 kW**
- Adjustable Working Temperature **0 - 90Â° C**

- Rotation Speed **4 RPM**
- Cradle Up-Down Speed **60 mm/sec**
- Hydraulic Unit Power **0,75 kW**
- Rotation Motor Power **0,18 kW**
- Machine Dimensions (LxWxH) **1920x1000x1800 mm**
- Packing Dimensions (LxWxH) **2200x1310x1470 mm**
- Weight **440 kg**

Â

## Equipment

- 4 Cylinder head holding flat parallels
- 2 Supports for slanted heads
- 8 Long-threaded bars with accessories
- 4 Clamping bars of Plexiglas plate with small plates (8 pcs.)
- 8 Long-threaded fixing bars L=400 mm with accessories
- Plexiglass plates "500x250x30 mm" "800x250x30 mm"
- Rubber sheet 500x500x3 mm
- Rubber sheet 500x500x8 mm
- Slide plate complete of quick coupling
- 1 It tank of anti limestone
- Service tools
- Operating manual
